

GAS / OIL FIRED HEATERS

Gas Fired Heaters are available in either Propane, Natural Gas, LP/NG (Dual), and Oil. Portable heaters are safe, efficient, and very practical. There are Direct Fired and Indirect Fired Heaters. Direct fired heaters are for well ventilated applications which require a lot of heat. Indirect fired heaters on the other hand supply 100% clean heated air, can be ducted, and the flame is not in contact with the air.

EQUIPMENT MODEL	TYPE	FUEL	BTU	VOLTAGE /PHASE	BREAKER AMPS	NEMA PLUG	DIMENSIONS W x D x H	WEIGHT/ SHIPPING
TS080DF	Direct(Duct)	LP, NG	80,000	115/1	15	5-15	13.5 x 28 x 22	79
